

ENVIRONMENTAL POLICY:

Since 1999 our company has continued to provide building fabric reactive maintenance and over more recent years we have grown to provide multi-discipline trades to include M & E services. In addition to planned and reactive maintenance our projects division offer a solution to most property refurbishment requirements. Since our inception our team have completed many projects on well known properties throughout the region including many listed buildings.

Triple Shield Property Maintenance Ltd including directors, management & employees appreciates that activities and services have impact on the environment. We are therefore committed to the continual improvement of our environmental performance. We aim to achieve this by setting environmental objectives and targets, in line with the following commitments:

- **Maintaining an Environmental Management System whilst Working towards ISO 14001 Certification Standard.**
- **Assess and manage the environmental impacts of our operations.**
- **Raise environmental awareness of staff through continual CPD and training.**
- **Encourage and facilitate staff engagement in both internal and external environmental projects.**
- **Comply with all relevant environmental legislation and other requirements.**
- **Prevent pollution to air, water and land.**
- **Encourage sustainable consumption associated with our activities to minimize unnecessary waste of electricity, fuel and materials.**
- **Consider environmental credentials of our contractors and source locally where practical.**

We have and shall continue to calculate our carbon footprint based on direct emissions in connection with our business. In addition to this and in recognition of the environmental impact of our business operations we invest in the creation of new woodlands in the UK that will not only capture, over time, the CO2 emissions from our vehicles and operations, but will also provide significant other environmental and social benefit to the UK. These woodlands are certified to ISO standards under the UK government Woodland Carbon Code, and meet international environmental and carbon project rules.

This document is communicated to all employees and relevant parties and is made available to the public via the company website. It shall be the responsibility of all individuals working for and on behalf of Triple Shield Property Maintenance Ltd to conduct business practices in line with this policy.

S. Simmons

Managing Director
